

Informationsprobleme in Gesundheitsmärkten (Imperfect Information in Health Care Markets)

(Course number 14289.0013 and 14289.0014)

This course is part of different master modules, including “Imperfect Information in Health Care Markets”, “Information Problems in Health Care Markets” and “Specific Markets B”.

Please see your course catalogue for further information.

In this course, we will first analyse the consequences of information problems in health care markets and look for possible solutions to those problems on a theoretical basis. In the second part, we will examine how existing health care systems cope with those information problems and which possible side effects may arise from government interventions.

Core literature:

- Bhattacharya/Hyde/Tu (2014): Health economics. Palgrave Macmillan
- Breyer/Zweifel/Kifmann (2009): Health economics. Springer

...and additional literature in form of journal articles where appropriate
